Data Analytics Graduate Program

Interim Internship Evaluation Form

This document should be used as a source for discussion at the mid-point of the internship program (after you've completed approximately 50 hours). This form must reflect any changes to the initial internship proposal as well as provide a plan for the completion of the internship.

Students: please fill out this form with your internship supervisor. Once complete, please submit this form to the Canvas and notify the DA Program Manager at data.analytics@tufts.edu. This form must be completed and returned halfway through your program. Keep a copy of this document for your records.

Student Information

Name: AHMED SALEEM PANHWAR Date: DEC 2, 2024

Email: ahmed.panhwar@tufts.edu Phone: +1-339-545-6709

Internship Semester (e.g. Fall, Spring): FALL Year: 2024

Academic Advisor: JEFFREY ZABEL

Supervisor Information:

Supervisor name: NIRAV SHAH

Supervisor's title or role in organization: CEO

Email: nirav.shah@onpointinsights.us

Completed Hours: 210 HOURS

Expected end date (mm/dd/yy): DEC 6, 2024 Any Changes to End Date? Yes ✓ No

Current hours per week: 15-20 Compensation (per hour or total): N/A

Internship Updates

Please describe your current **duties, work products,** and **goals**. Be sure to note any changes from your initial proposal.

In this specific case, I am focusing on creating Tableau dashboards tailored to various industries, including the gym sector, superhero statistics, hotels, and Spotify trend analysis.

This endeavor aligns with my goal of leveraging these projects to showcase my skills and market my expertise for future opportunities in data analytics or business analytics. The insights derived from these dashboards will provide significant value by helping stakeholders understand critical visualizations essential for informed decision-making and enhancing their domain knowledge.

Additionally, I am considering pursuing online training in Power BI and obtaining relevant certifications in the field of data science. These efforts aim to strengthen my professional profile, enhance my technical expertise, and enable me to produce more impactful content. By leveraging these advanced skills, I also intend to build meaningful connections with key stakeholders and position myself for future opportunities in the field.

I am particularly interested in enhancing my expertise in Tableau and Power BI, as these visualization tools are highly effective in capturing the attention of stakeholders and aligning with their interests. By focusing on these platforms, I aim to create compelling visual content that resonates with stakeholders, thereby optimizing my approach to marketing and engagement.

Please describe your expected **duties, work products,** and **goals** for the remainder of your internship. What are the next steps or plan for completion of your internship?

I am currently in the process of finalizing the dashboards and storyboards I have developed. To enhance the quality and effectiveness of the visualizations, I am seeking expert feedback from relevant stakeholders and my supervisor. This collaborative approach aims to ensure the dashboards are refined to meet the highest standards and effectively convey insights.

In the meantime, I am actively working on building stronger personal connections across various states in the USA and expanding my professional network on LinkedIn. These efforts are aimed at increasing my visibility and improving my prospects for securing a rewarding job opportunity.

The ultimate goal of this internship is to enhance my portfolio by creating impactful and engaging content that resonates with potential employers. By showcasing my skills and accomplishments to the right audience, I aim to secure endorsements for my profile and pave the way for a strong career start in the USA.
